## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

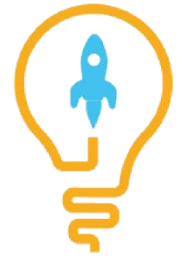

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

## FUN FACT

1. Regrouping is commonly referred to as “carrying forward” in addition.
2. Do you know what carry over means? It is a digit that is transferred from one column of digits to another column. For example, when 6 and 7 are added to make 13, the “3” is written in the same column and the “1” is carried to the column to the left.
3. When do you need to carry over? When the sum of a column is greater than 9, we need to bring (carry over) the second number to the next column to the left.
