FUN FACT

1. In mathematics, **subtraction** means to take away some things from a group.
2. We use **minus sign (-)** as the subtraction symbol when one number is subtracted from another number.
3. Partition the number we want to remove (subtrahend). To do that, write the number in its expanded form. For example, we need to find $73 - 22 = 73 - 20 - 2 = 53 - 2 = 51$
