FUN FACT

1. We can't regroup from zero but we can make a "0" into a "10" by regrouping it first, then carry on normally.
2. First we perform a subtraction on the numbers in the Units column on the right, then write the answer at the bottom in the same column.
3. The tens column has a 0 in it so there is nothing to borrow, so we have to move to the next column to the left and so on.
