## 3D Shapes Worksheet- 4

- 1) Ryan made a solid shape which has 5 faces and 6 vertices.  
What shape has he made?

- 2) Pick the odd one out and state the reasons.

- 3) What are the differences found in these shapes?

4) Which figure will this net make?

a)

b)

5) Which net will make a cuboid?

6) Ron took a solid shape. It had 1 vertex and 2 faces. What shape did he take?

a) Cylinder   b) cone   c) cuboid

7) Sharon made a 3d shape out of a cardboard. It has 6 square faces. Which shape could she have made?

a) Cube   b) triangular prism   c) cone

8) Identify the shape.

This shape is made of \_\_\_\_\_ triangles.

It is made of triangles and a \_\_\_\_\_.

Faces = \_\_\_\_\_

Vertices = \_\_\_\_\_

Edges = \_\_\_\_\_

9) How many faces does the shape have?

a) 3

b) 2

c) 4

10) This shape is a \_\_\_\_\_. It has \_\_\_\_\_ faces,  
\_\_\_\_\_ edges and \_\_\_\_\_ vertices.

When you learn math  
in an interesting way,  
you never forget.

## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	Triangular prism
2)	A cube has a flat face
3)	A cube has 6 square flat faces, whereas a cuboid has 6 rectangular faces or 4 rectangular and 2 square faces.
4)	a) cone
5)	a) makes the cuboid
6)	b) cone

7)	a) cube
8)	Pentagonal pyramid 5 triangles Pentagon 6 faces, 10 edges and 6 vertices.
9)	2 faces
10)	Cube has 6 faces 12 edges and 8 vertices.

## FUN FACT

1. Cylinder and sphere don't have the pointy bits or the vertices.
2. Did you notice that in the cube and the pyramid, the count of the faces + count of the vertices - count of the edges = 2?
3. 11 different nets can be folded to make a cube.
