Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

FUN FACT

1. Adding zero to any [number](#) gives the number itself. For example, $1489 + 0 = 1489$.
2. The terms such as "altogether", "sum", "total", "increase" and "add on" mean that you need to add one number to the other.
3. Do you know [multiplication](#) is also repeated [addition](#)?
