## 4th Grade Geometry Worksheets

1. Classify the triangles as scalene, isosceles, equilateral or right angled triangle.

a.

b.

2. Classify the following angles as acute, obtuse, right or straight angles

a.

\_\_\_\_\_

b.

\_\_\_\_\_

c.

\_\_\_\_\_

3. Classify the quadrilaterals as rectangle, square, parallelogram or trapezoid.

a.

b.

c.

4. Construct the following angles

a) 100 degree   b) 45 degree

5. State if the following angles are acute, obtuse, right or straight

a) 89 degree   b) 167 degree

6. Which of the following are polygons?

a.

b.

c.

7. Mark with a 'Y' for the triangle among the given figures?

a.

b.

c.

8. Is a circle polygon?

a) Yes      b) No

9. Which solid shape does a fire extinguisher resemble?

a) cube      b) cylinder

10. Classify each of them as convex or concave polygons

a.

b.

c.

When you learn math  
in an interesting way,  
you never forget.

**25 Million**

Math classes &  
counting

**100K+**

Students learning  
Math the right way

**20+ Countries**

Present across USA, UK,  
Singapore, India, UAE & more.

## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

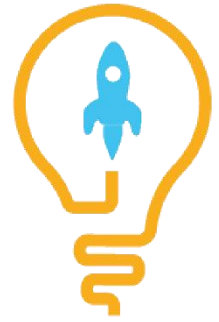

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	a) Equilateral b) Scalene
2)	a) Acute b) Obtuse c) Obtuse
3)	a) Square b) Rhombus c) Rectangle
4)	Construct the angles using protractor
5)	a) Acute b) Obtuse
6)	a) and c)
7)	a) - Y
8)	b) No
9)	b) Cylinder
10)	a) Concave b) Convex c) Concave

Solution:

1. a) Equilateral triangle as all the three sides are equal  
b) All the three sides are of different measures hence, scalene triangle
2. a) Acute angle      b) Obtuse angle      c) Obtuse angle
3. a) Square since all the sides are equal and opposite sides are parallel with all the angles equal to 90 degree  
b) Rhombus, as opposite sides are parallel with equal adjacent sides  
c) Rectangle since opposite sides are parallel and equal with all the angles equal to 90 degree

4.

5. a) Acute angle      b) Obtuse angle
6. a) and c) are polygons as it is a closed figure made up of line segments

7. Figure a) is a triangle. Hence, a) - Y
8. b) No, a circle is not a polygon as it is not made up of segments
9. b) Cylinder as a fire extinguisher cylinder is cylindrical in shape
10.     a) Concave as it has one angle greater than 180 degree  
          b) Convex since all the angles are lesser than 180 degree  
          c) Concave as it has one angle greater than 180 degree

**FUN FACT**

1. The sum of angles of a triangle is equal to  $180^\circ$
2. The letter 'L' forms a  $90^\circ$  between its standing and sleeping line.
3. All our body parts are aligned in such a way that there are different angles formed between our body parts.
