FUN FACT

1. Multiply any number by 10 and half your answer to get multiples of 5.
To find 5 times 6, do $10 \text{ times } 6 = 60$ and then divide by 2 to get the product 30.
2. Repeatedly add 5 and get its multiples.
3. One quick way of identifying the multiples of 5 is to know that they always end in either a 5 or a 0.
