Adding and Subtracting Fractions Worksheets

1) Add $\frac{1}{2} + \frac{1}{3}$ and $\frac{2}{5} - \frac{1}{4}$.

2) What is the result obtained on subtraction of $\frac{1}{4}$ from the sum of $\frac{1}{2}$ and $\frac{1}{3}$?

3) Find the missing term: $\frac{1}{2} - \frac{1}{3} = \frac{\quad}{6}$

4) A father gave three-eighth pizza to his children and two-eighth to his wife. What fraction of pizza was left for him?

5) Solve: $\frac{1}{2} - \frac{1}{3} = \frac{\quad}{6}$

6) Find the difference: $\frac{1}{2} - \frac{1}{3} = \frac{\quad}{6}$

7) What fraction when added to $\frac{1}{2}$ would give the result as $\frac{3}{4}$?

8) Evaluate the given expression: $\frac{1}{2} - \frac{1}{3} + \frac{1}{4} - \frac{1}{5}$

9) Solve: $8 + \frac{2}{7} - 7$

- 10) One day $\frac{5}{7}$ th portion of a land was given for sale. The next day they removed $\frac{1}{3}$ th of the land from sale portion. How much portion of land can still be told on sale?

Singapore, India, UAE & more.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	$23\frac{3}{28}$
2)	$15\frac{103}{104}$
3)	$22\frac{8}{21}$
4)	$3\frac{3}{8}$
5)	$7\frac{5}{6}$
6)	$3\frac{73}{200}$
7)	$1\frac{17}{72}$
8)	$8\frac{1}{20}$
9)	$1\frac{2}{7}$
10)	$\frac{8}{21}$

FUN FACT

1. Adding or subtracting [fractions](#) is similar to adding or subtracting the whole numbers when you have the common denominators.
2. For the fractions with common [denominator](#), while adding or subtracting fractions, simply perform the operations on the numerators and retain the denominators.
3. Even if you don't have a common denominator, you need to make it common first by taking the [LCM](#) and multiplying it.
