FUN FACT

1. Do you know that when we subtract 0 from any number, the difference is the number itself? For example, 8 - 0 = 8.
2. When 1 is subtracted from any number, you get the previous number, or the predecessor. For example, 6 - 1 = 5.
3. When 1 is added to a number, we get the next number, or the successor. For example, 14 + 1 = 15.
