FUN FACT

1. The order in which you add a group of numbers don't matter, the answer is the same. For example, $2 + 5 + 3 = 10$; and $5 + 3 + 2 = 10$.
2. Adding zero to any number gives the number itself.
3. The sign used to denote an addition is '+'.
'+'.
4. When 1 is added to any number, the sum is the successor of that number.
