## FUN FACT

1. Adding zero to any number gives the number itself. For example, 14 + 0 = 14.
2. When 1 is added to any number, you get the next number. For example, 5 + 1 = 6.
3. The order in which you add a group of numbers doesn't matter, the answer is the same. For example, 2 + 5 + 3= 10; and 5 + 3 + 2= 10.
