Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

FUN FACT

1. Do you know that when we add 0 to any number, the sum is the number itself? For example, $8 + 0 = 8$.
2. When 1 is added to any number, you get the next number, or the successor. For example, $76 + 1 = 77$.
3. The order in which you add a group of numbers doesn't matter, the sum remains the same. For example, $2 + 5 + 3 = 10$; and $5 + 3 + 2 = 10$.
