1) In the Following figure what is this measurement called?

2) The .......... is defined as the amount of space taken by a surface.
   a. Perimeter
   b. Area
   c. Circumference
   d. Radius

3) If the radius of a circle is 7 units. Find the area of a circle.

4) Find the area of the half-circle if its radius is 10 units?

5) Find the area of a given triangle.
6) Find the area of the shaded region.

7) The Radius of Earth is 3,963 miles. What is the surface area of Earth?

8) What is the area of the polygon?

9) Find the area of the combined shape, given below.
Q.10 Find the length of the one diagonal of a kite. If it has an area of 325 square inches and the length of the other diagonal of a kite is 25 inches.
When you learn math in an interesting way, you never forget.

25 Million
Math classes & counting

100K+
Students learning Math the right way

20+ Countries
Present across USA, UK, Singapore, India, UAE & more.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

1. If we are measuring the area of a parallelogram, then the area will be equal to the base multiplied by the perpendicular height.

2. To find the area of a rectangle, you simply need to multiply the length and width together.

3. If we measure the area of a kite, then we need to multiply the two diagonals.
