Area Of Compound Shapes Worksheets

1) Find the value of x in the given figure, if its area is 54

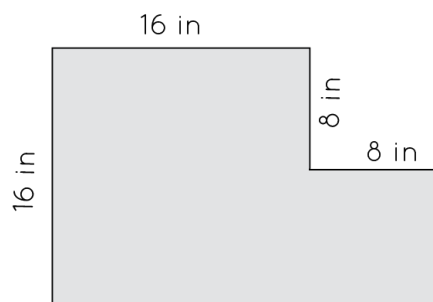

2) State whether true or false:

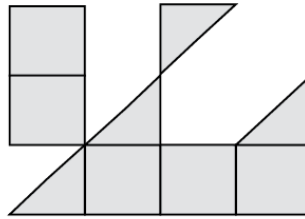

The area of the given compound shape is equal to 43 .

3) John constructed a garden of the following given shape and dimensions in his backyard. Calculate its area.

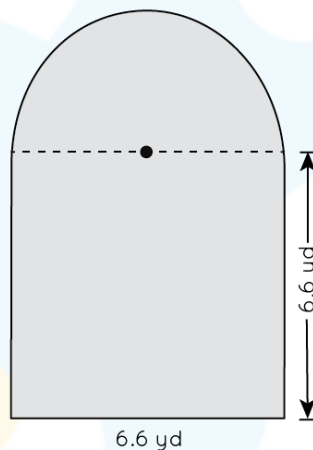

- 4) Find the area of the following composite shape if the area of 1 block is 3ft^2 .

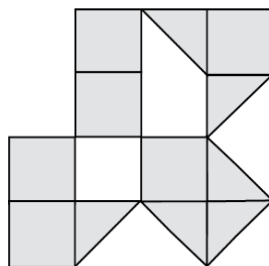

Area = ft^2

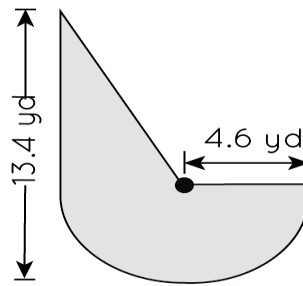

- 5) Noah constructs a swimming pool in his backyard. The shape and dimension of the pool is given in the following figure. Calculate the area of the water surface.

- 6) State whether true or false:
The area of a rhombus with each side 5 units is equal to that of a square with same side length.
- 7) Choose the correct option for the area of the given shape if 1 block = 1ft^2 .

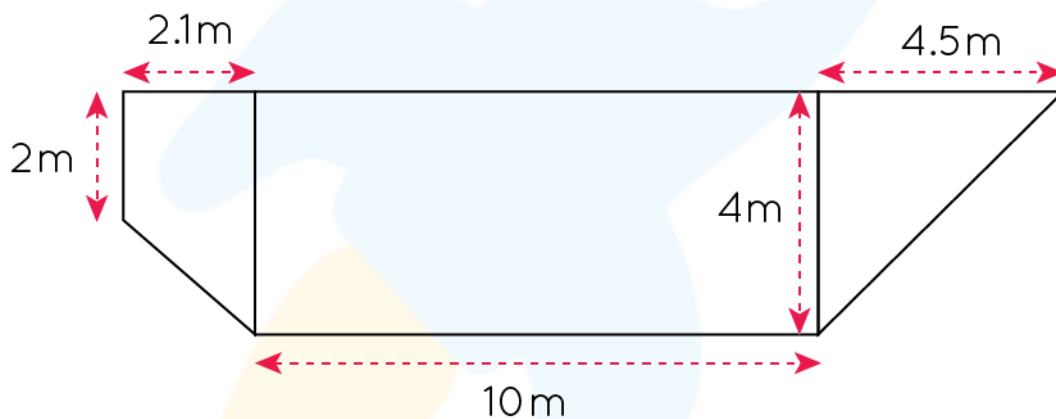

8) Find the area of the shaded region in square units.

9) A circle of radius 7 is cut out from the center of a square with each side measuring 21 in. Find the area of the resultant shape.

10) The cross section of a river is given below. Calculate the surface area, considering the comprising shapes to be trapezium, rectangle and triangle.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

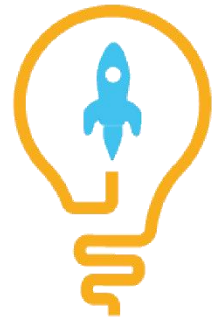

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	3 cm
2)	True
3)	320 in^2
4)	21 ft^2
5)	60.66 yd^2
6)	True
7)	9 ft^2
8)	53.47 yd^2
9)	287 in^2
10)	55.3 m^2

FUN FACT

1. In the 7th century CE, Brahmagupta developed a formula, now known as Brahmagupta's formula, for the area of a cyclic [quadrilateral](#).
2. The formula to calculate the area of a [triangle](#) using half base height formula was given by the Indian mathematician Aryabhata in 499.
3. Four dimensional shapes made of polygons are called polychorons, and shapes made of polygons of any dimension are polytopes.
