Area of Polygons Worksheet III

- 1) Formula for the area of the pentagon is_____.
- 2) The area of the square is 102 sq. in. One side is 11in.
 - a. True
 - b. False
- 3) Which formula is for finding the area of a hexagon?
 - a. $A = \text{length} \times \text{width}$
 - b. $A = \text{base} \times \text{height}$
 - c. $A = \frac{1}{2} \text{ base} \times \text{height}$
 - d. $A = \frac{3\sqrt{3}}{2} \text{ side}^2$
- 4) Formula for the area of a given rhombus is_____

- 5) The area of a triangle is $\frac{1}{2} \text{ base} \times \text{height}$, what is the area of a triangle with a height of 15 inches and a base of 6 inches?
- 6) The area of a parallelogram is its base multiplied by its height, what is the height of a parallelogram with an area of 96 sq. units and a base of 12 units?

7) If the area of the rectangular board is 156 sq. inches and the length of the board is 13 inches, how wide is this board?

8) Determine the area of a triangle with a height of 15 inches and a hypotenuse of 17 inches?

9) The sum of two parallel lengths of a trapezoid ABCD is 16 m and the area of the trapezoid is 80 sq m. What is the height of trapezoid ABCD?

10) Find the area of a given combined figure.
Where PQRS is a parallelogram and PST is a triangle.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1. $\frac{5}{2} \times \text{side} \times$ apothem	2. False	3. d.	4. $p \times q / 2$	5. 45 sq. inches
6. 8 units	7. 12 in	8. 60 sq. inches	9. 10 m	10. 160 sq. in

FUN FACT

1. Area of any polygon is measured in square units.
2. Different rectangles may have the same areas but different perimeters. Try finding the areas and perimeters of rectangles with dimensions 20×20 and 40×10 .
3. The area of any regular polygon is equal to half of the product of the perimeter of a base and its apothem.
