1) Write the Number statement for the model shown below

2) Fill in the blank: 10 + (5 + 3) = (10 + ___) + 3

3) Find the missing blank and the sum

   5 + (7 + 5) = (5 + 7) + ___ = ___

4) Choose the correct option for the number on the blank

   4 + (1 + 3) = (4 + ___) + 3
   a) 1
   b) 4
   c) 5
5) $8 + (8 + 10) = (___ + 8) + 10$. The number on the blank will be 8. State True or False.

6) Fill the missing number and then find the sum:

$$2 + (10 + 7) = (2 + 10) + ___ = ___$$

7) Identify the mistake in the given statement:

$$7 + (5 + 3) = (7 + 5) + 4$$

8) In the Right side of the equation, put the addition symbol correctly.

$$5 + (1 + 1) = (5 _ 1) _ 1$$

9) Put the correct sign ($>$, $<$, $=$):

$$(9 + 8) + 7 _ 9 + (8 + 7)$$

10) Match and write the sum correctly

a) $8 + 7 + 6$ 1) $9 + 8 + 10$

b) $9 + 10 + 8$ 2) $10 + 4 + 4$

c) $4 + 10 + 4$ 3) $7 + 8 + 6$

Why choose Cuemath?

“Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!”

- Gary Schwartz

“Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus.”

- Kirk Riley

“I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda.”

- Barbara Cabrera

</table>
1. The order of number doesn’t matter in an addition. Sum will still remain the same.

2. Associative property always involves 3 or more numbers.

3. There is also associative property of multiplication.

4. Subtraction and Division are not associative.
