Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

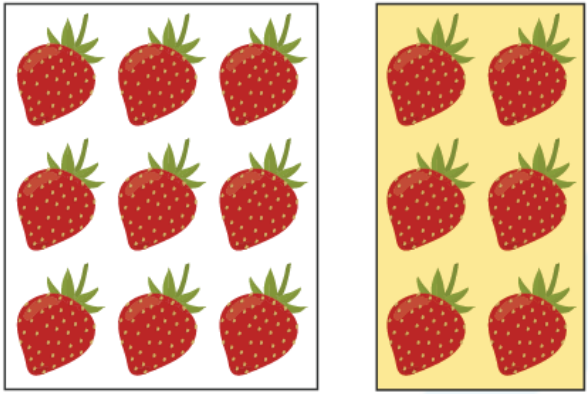

- Barbara Cabrera

| 10) | b. |

FUN FACT

1. When we count numbers from 1 to 10, they are in ascending order and when we count numbers from 10 to 1, they are in descending order.
2. 1. Removing 0's reduces the value of a number. For example $10 > 1$ as one 0 is removed.
3. The symbol $>$ or $<$ are called logical operators as it is used to compare.
