Compound Probability Worksheets

What is the probability of following events while playing with a deck of 52 cards?

1. Getting 5 of hearts of twice
2. Getting a queen and getting a king
3. Getting a card with a number between 1 to 4 and another king?
4. Getting a card of hearts and clubs?
5. Getting a red coloured card?

State whether the following are True/False while playing with a deck of 52 cards?

6. The probability of drawing a Ace is greater than the probability of drawing a Queen.
7. The probability of drawing a card of hearts is equal to the probability of drawing a card of diamonds.
8. The probability of drawing a face card is less than the probability of drawing a card of hearts.
9. There are 52 different total outcomes while playing with a regular deck of cards.
10. How many cards should be thrown away in a deck of cards so that the total possible outcomes of any particular number or face card is 3?

When you learn math
in an interesting way,

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera
