## Decimal Subtraction Worksheet-4

- 1) Subtract 0.03 from 0.25 using the number line given below.

- 2) Subtract 275.4 from 603.8

$$\begin{array}{r} 603.8 \\ - 275.4 \\ \hline \end{array}$$

--	--	--	--	--	--	--	--

- 3) Write blue and orange colored shaded portion in decimals and subtract the smaller number from the bigger number.

- 4) Kim travelled 230.25 miles and Jack travelled 336.37 miles by car. Find who travelled more and by what distance?

5) If you subtract 34.98 from me, I become the smallest prime number. What number am I?

6) Find the difference between 3112.8 and 312.08 using column subtraction.

7) Kate had \$709.18. She gave \$185.26 to Rubella, \$450.05 to William and the remaining amount to Susie. How much did she give to Susie?

8) Find the missing value.

$$100.8 - \boxed{\phantom{000}} = 39.04$$

$$\boxed{\phantom{000}} - 23.4 = 32.007$$

9) Subtract the difference of  $(22.98 - 4.14)$  from 274.3

10) State whether the given subtraction equations are true or false. If false, write the correct answer.

a)  $7.7 - 4.95 = 2.75$

b)  $54.6 - 39.65 = 15.85$

When you learn math  
in an interesting way,  
you never forget.

Singapore, India, UAE & more.

## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

9)	255.46																												
10)	a) true, b) false, 14.95																												

## FUN FACT

1. Every [fraction](#) is a decimal but every [decimal](#) is not a fraction.
2. There are different symbols used as a decimal point in different countries. For example, in many European countries a comma ',' is used to denote decimal.
3. One should convert given decimal numbers to like decimals in order to subtract them easily.
