Division Equal Groups Worksheet-3

1) Fill In the Blanks given:

There are equal groups of

2) How many equal groups can be formed of 400, if there are only 4 items in each group?

3) If a box has 20 choco puffs, can all the choco puffs be equally distributed among 10 children? If yes, how many chocopuffs will each child get?

4) 30 pieces of pizza are equally packed in 2 boxes as shown in the image. How many pieces does each box have?

5) State true or false for each of the given division facts.

a) $100 \div 2 = 50$

b) $48 \div 5 = 6$

6) Show the division fact on the given number line:

Eight items have to be divided into groups of four.

Number of groups formed =

7) Divide the following number of items into equal groups such that each group will have 2 items. Write your answers in the box.

a) 684

b) 260

8) If a bell rings in every 4 minutes, how many times does it ring in 24 minutes?

9) If the capacity of a cereal box is 50 cereals. Can we fit 500 cereals into those boxes without any left out? If yes, find the number of boxes required.

10) Zee and Ron agreed to share 30 pencils equally amongst them. How many pencils will each of them get?

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	2, 3
2)	100
3)	2
4)	15
5)	True, False
6)	2
7)	a-342, b-130
8)	6
9)	10
10)	15

FUN FACT

1. When dividing any number by 1, the answer for the problem will always be the number that we divided it with. This means that if the divisor is 1, then the solution will always be the same as the dividend such as $69 \div 1 = 69$.
2. Division by the number 0 is always undefined.
3. The division operation of the same dividend and divisor will always be one. For example:
 $46 \div 46 = 1$.
