Equivalent Ratios Worksheets 6th Grade

1. Find the ratio equivalent to **2:5**.
2. The ratio **11:10** and **55:50** share a relation with each other, in the same way **8:19** share the same relation with a ratio. Find the ratio.
3. Find the value of ***m*** for which the ratios **6:*m*** and **18:24** are equivalent.
4. The sum of two numbers is 96. If the ratio between them is **11:1**, find the difference between the two numbers.
5. The variable ***t*** and **3** share a ratio equal to that of the numbers **27** and **81**, find the value of ***t***.
6. Express each ratio as a fraction in the simplest form.
 - A. **15** balloons out of **60** balloons
 - B. **8** cups out of **36** cups

7. There are **500** boys and girls who enrolled to an extracurricular activities camp. If the number of boys and girls are in the ratio **11:14**, how many more girls than boys enrolled for the camp?

8. The ratio of bananas to apples in a basket full of fruits is **27:17**. If there are **200** bananas more than apples. How many apples are there?

9. **3** parts of lime and **8** parts of soda are mixed to form a lime soda juice. How many parts of lime must be mixed with **11** parts of soda to get the same taste?

10. The radius of a circle is r units. Find the ratio of its original area to the new area if the radius of the circle is tripled.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1) 4:10	6) A) 1:4 B) 2:9
2) 40:95	7) 60
3) 8	8) 340
4) 90	9) $\frac{88}{3}$
5) 1	10) 1:9

FUN FACT

1. Ratios can be expressed as fractions
2. Fractions can be expressed as ratios
3. Same quantities are compared using ratios
