Finding Slope and Y Intercept Worksheets

- 1) The slope of the line that passes through the points $(-2, 11)$ and $(-2, 6)$ is ____
- 2) The slope of the line that passes through the points $(3, 5)$ and $(-7, 5)$ is ____
- 3) The slope of the line that passes through the points $(7, -5)$ and $(3, -4)$ is ____
- 4) The slope of the line that passes through the points $(1, 27)$ and $(8, 3)$ is ____
- 5) The graph shows the distance travelled by a three-person lift passes through the points $(6, 10)$ and $(5, 4)$. Find the slope of the line joining these two points.
- 6) Find the slope of the line AB .

- 7) If the slope of the line passing through the points $(1, k)$ and $(7, -9)$ is -1 , find k .

8) Match the following lines (where two points of it are given) with their slopes.

a. $(1, 1)$ $(2, -3)$	1. 12
b. $(0, 3)$ $(5, 4)$	2. -2
c. $(6, 3)$ $(-4, -2)$	3. 15
d. $(0, 7)$ $(3, 1)$	4. -4

9) A table shows the altitude y (in miles) of a rocket x minutes after its launch. Find and interpret the slope of the line joining the following pairs of points.

x	1	3	7	11
y	5	12	26	40

10) Are the following points collinear? Justify your answer. Hint: Check whether the slope of AB = slope of AC .
 A $(-10, 0)$, B $(0, 5)$, and C $(-4, 3)$.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

ANSWERS

1)	Undefined
2)	0
3)	$-1/4$
4)	$-24/7$
5)	6
6)	$-1/2$
7)	-3
8)	a)4 b)3 c)1 d)2
9)	$7/2$. It is the number of miles traveled by the rocket in 1 minute.
10)	Yes. Slope of \overline{AB} = Slope of \overline{AC} = $1/2$

FUN FACT

1. If the slope of the line is positive, it is increasing.
2. If the slope of the line is negative, it is decreasing.
3. If the slope of the line is 0, it is horizontal and hence it is parallel to x-axis.
