Graphing Linear Inequalities Worksheets

1. The side of a triangle which is the longest is thrice the shortest side and the third side is 3cm longer than the shortest side. If the perimeter of the given triangle is more than 180 cm then calculate the minimum length of the shortest side of the triangle.
2. How many solutions does the equations have: $4y + x = 5$ and $8y + 2x = 10$?

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera
