## Identify Quadrilaterals Worksheet 4

Name the quadrilaterals shown below.

1.

2.

3.

4.

5.

Draw the following quadrilaterals.

6. Rhombus

7. Rectangle

8. Parallelogram

9. A trapezium has two sets of parallel sides.

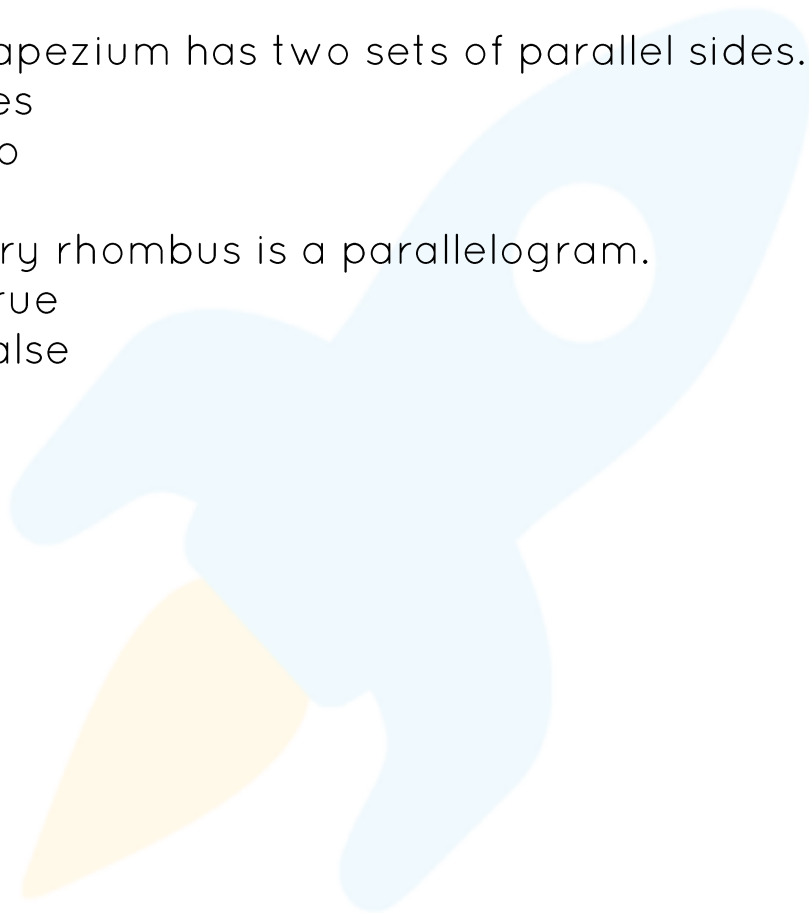

a) Yes

b) No

10. Every rhombus is a parallelogram.

a) True

b) False

When you learn math  
in an interesting way,  
you never forget.

Math classes &  
counting

**100K+**

Students learning  
Math the right way

**20+ Countries**

Present across USA, UK,  
Singapore, India, UAE & more.

## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	square
2)	trapezium
3)	Kite
4)	rectangle
5)	parallelogram
6)	Draw the quadrilateral
7)	Draw the quadrilateral
8)	Draw the quadrilateral
9)	No
10)	True

## FUN FACT

1. We can find the perimeter of all geometrical shapes.
2. Surface area is used in everyday life with respect to:  
Painting/polishing a surface. Gift wrap needed for a gift. Dimensions of cardboard for making a box etc.
3. Let  $n$  be the number of sides of a regular polygon, then its perimeter is given by  $n \times \text{side length}$ .
