Inequalities Word Problems Worksheets

Translate the following statements in questions 1-4 to an inequality expression

- 1) Twice the sum of x and 3 is less than 5
- 2) Two-thirds of z plus 6 is greater than 5
- 3) One-fourth multiplied by sum of t and 9 is at most 9
- 4) Half of 7 added to product of h and 4 is at least 1
- 5) The quotient of a number and 5 is no greater than 450.
What are the possible values for the number?
- 6) The Yellow Taxi Cab Co. charges a \$2.75 flat rate and \$.65 for each additional mile. Emma has no more than \$14 to spend on a ride. How many miles can Emma ride without exceeding her spending limit?

- 7) Keith has \$500 in a savings account at the beginning of the summer. He wants to have at least \$200 at the end of the summer. He withdraws \$25 per week for food, clothing, and movie tickets. How many weeks can Keith withdraw money from his account?
- 8) You want to rent a limousine for a trip to the city. The limo costs \$700 for the night and \$0.15 per mile.

You have \$750 to spend. Write an inequality that represents this scenario. How many miles can the limo travel?

- 9) The length of a rectangle is 4cm longer than the width. The perimeter is no more than 28cm. What are the maximum possible dimensions for the rectangle?

- 10) Sara goes to Fredonia University. She has \$900 in her savings account. She needs to buy a small laptop computer before the next semester. The laptop costs \$600. Every 2 weeks she withdraws \$60 from her savings account for food. How many times can Sara withdraw money for food? Write an inequality to explain.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

ANSWERS

| | |
|-----|------------------------|
| 1) | $2(x + 3) < 5$ |
| 2) | $2z/3 + 6 > 5$ |
| 3) | $1/4(t + 9) \leq 9$ |
| 4) | $7/2 + 4h \geq 1$ |
| 5) | $x \leq 2250$ |
| 6) | 17 miles |
| 7) | No more than 12 weeks |
| 8) | $m \leq 333.33$ miles |
| 9) | $L=9$ $W=5$ |
| 10) | 5 times or 300 dollars |

FUN FACT

1. Inequality in math is when two solutions or answers are compared by greater than or less than.
2. Inequality is a mathematical statement that explains that the two values are not equal and are different.
3. When you divide or multiply an inequality with a negative number on both sides, the statement is false.
