Long Division with 2 Digit Divisors Worksheet-2

1) What is the result when 64974 is divided by 91?

$$91 \overline{) 64974}$$

2) A man can fill 40 buckets in a day. He has 4120 buckets to fill in total. How many days will it require to fill all the buckets?

3) A paper has 84 words written on each side. How many such papers are required to accommodate 8064 words? Assume that both sides of the paper must be entirely filled with words.

4) A writing job can be done in 73 days. How many such jobs can be done in a non-leap year?

5) State True or false:

- i) 729 divided by 27 equals 27.
- ii) 1332 divided by 11 equals 141.

6) Using the long division method, find out the remainder after dividing 9271 by 21.

7) What number must be multiplied to 17 to get a product of 3587?

8) Rob can eat 25 strawberries in a day. He has 50 dozen strawberries in total. How many days will he take to finish all the strawberries?

9) A pair of gloves cost \$11. How many such pairs can Jenny buy if she has \$165?

10) Fill in the blanks with numbers: $12 \times \underline{\quad} \underline{\quad} \underline{\quad} = 81468$

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera
