Mean Median Mode Range Worksheet

1. Find the mean of the following data points:

76,32,24,32,66,72,68,54,32,66

2. Find the range of the following:

5.2,5.7,5.2,4.3,3.6,3.8,2.7,4.2,4.3,3.9,4.2

3. Find the median of a list of consecutive integers from **31** to **65**.

4. The mean of five numbers is **22**, if each number is increased by **8**, find their new mean.

5. Find the mode of the following:

18.1,18.6,18.2,18.1,18.9,18.6,18.7,18.3,18.3,18.2,18.6,18.6

6. What will be the median of the following set of numbers?

126,132,128,124,134,142,134,146,134,132

7. John got the following points playing an online game:

121,119,137,131,X

If the mean of all the points is **128**, find the value of **X**.

8. What will be the mean of the first **7** prime numbers?
(Round off your answer to two decimal places)

9. The mean of X and Y is **21**. The mean of Y and Z is **22**. If the mean of X, Y , and Z is **25**. Find the values of X, Y , and Z .

10. In a classroom, if the average age of five students is **17 years**. If the age of the class teacher is taken together, then the average age increases by **3 years**. Find the age of the class teacher.

When you learn math
in an interesting way,
you never forget.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1) 52.2	6) 133
2) 3	7) 132
3) 48	8) 8.29
4) 30	9) $X = 31, Y = 11, Z = 33$
5) 18.6	10) 35

FUN FACT

1. Mean, Median, Mode and Range are used for statistical comparisons of data
2. To calculate the mean of a given set of data, we must know the sum of all the observations and the number of observations
3. For any five data points a, b, c, d , and e , mean is given by:

$$\text{Mean, } \bar{x} = \frac{a+b+c+d+e}{5}$$
