Mean, Median, Mode Worksheet-2

- 1) Find the mean, median, mode, and range for the set of numbers:

112, 213, 108, 234, 171, 119

- 2) An ice-cream van sells a range of different ice creams for 2 weeks. This is the number of ice-creams he manages to sell.

Week 1: 87, 75, 45, 68, 44, 34, 96

Week 2: 23, 47, 35, 44, 59, 76, 88

Calculate the mean, median, and mode for his total sale.

- 3) Calculate the mean and median of the first 10 prime numbers.

- 4) If the mean of the given set of numbers is 19. Calculate the value of x.

12, 34, 9, x, 17, 21

- 5) Choose the correct option:

If the mean of 6 numbers is 43, then, the sum of these numbers is:

- a) 252
- b) 258
- c) 49
- d) None of the above

6) State whether true or false:

- a) A measure of central tendency is a single value that is used to represent an entire set of data.
- b) Arithmetic mean is based on very few observations of a series and is not capable of further mathematical treatment.

7) Calculate the sum of mode and median of the data:
12, 15, 11, 13, 18, 11, 13, 12, 13.

8) The mean of 5, 9, $x + 2$, 10, $2x - 1$, and 2 is 9. Find the value of x and also the value of the observation in the data.

9) Find the mean of the first ten whole numbers.

10) Rick and James are on a bowling team. Below are their bowling scores.

Rick: 220, 240, 219, 199, 189

James: 230, 204, 244, 200, 215

How much higher is Rick's median score than James's median score?

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

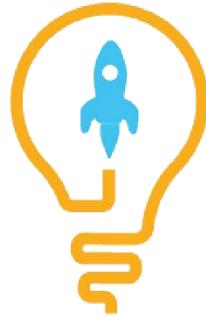

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

ANSWERS

1)	159.5; 145; 112, 213, 108, 234, 171, 119;
2)	54.8; 47; 44
3)	12.9; 12
4)	21
5)	b) 258
6)	a) True b) False
7)	26.11
8)	9; 11; 17
9)	4.5
10)	4

FUN FACT

1. Arithmetic mean represents most probable value of the data.
2. Mean is the ratio of total values to the number of values.
3. Median is the middle number.
