Multiplication and Division Worksheets Grade 5

1) Calculate the product for the following:

a) 18310×15

b) 2082×67

2) Match the following division operations with their products.

Operation	Result
1. $4500 \div 36$	a. Remainder = 3
2. $3430 \div 23$	b. Quotient = 125
3. $2175 \div 15$	c. Remainder = 1
4. $5545 \div 12$	d. Quotient = 145

3) Perform the division operation and find the quotient.

a) $3250 \div 26$

b) $77938 \div 19$

4) Calculate the remainder and verify your answer:

$9999 \div 11$

5) Fill in the blanks.

$15 \times 48 = \underline{\quad}$

$15 \times \underline{\quad} = 720$

$720 \div \underline{\quad} = 48$

$720 \div 15 = \underline{\quad}$

6) Complete each family of facts.

$$\square \times \square = \square$$

$$\square \times \square = \square$$

$$\square \div \square = \square$$

$$\square \div \square = \square$$

7) State whether true or false.

- Multiplication operation can be performed to check the result for the division.
- Division is repeated subtraction.

8) There are 286 calories in a chocolate bar. How many calories are there in a pack of 24 bars?

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

FUN FACT

1. Multiplication of any number by 1 results in that number itself.
2. The word Multiply originated from the Latin word “multiplicō” which means ‘many fold’.
3. Multiplication is the inverse operation of division.
