Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

FUN FACT

1. Decimals were even adopted to the counting system by the Egyptians. By around 1500, almost all professional mathematicians accepted decimals and thus they became an integral part of the counting system around the world.
2. [Multiplication of decimal numbers](#) with whole numbers is similar to the multiplication of [whole numbers](#), the only difference being in the placement of the decimal point.
3. We move the decimal point to the right side by as many places as there are zeros over 1 to multiply any decimal number with powers of 10.
