MULTIPLYING INTEGERS WORKSHEETS

1) $-3 \times (-2) = \underline{\quad}$

2) $(-5) \times \underline{\quad} = 10$

3) $(-6) \times (-11) \times 5 = \underline{\quad}$

4) $(-7) \times (-2) \times \underline{\quad} = -70$

5) Fill the following table by multiplying the corresponding integers.

\times	-3	-12
4		
-5		

6) Verify the associative property of multiplication for the integers $a = -5$, $b = -2$, and $c = -3$.

i.e., verify whether $a \times (b \times c) = (a \times b) \times c$.

7) The product of four negative integers is a _____

a) positive integer

b) negative integer

c) either a positive or a negative integer

- 8) A stock loses 3 points every hour for 5 hours. Write an integer that represents the total points that the stock lost in 5 hours.

- 9) Find $(-7) \times [30 + (-5)]$ using the distributive property.
- 10) An elevator descends at the rate of 7 meters per minute. What integer would represent its position after an hour if the distances above and below the ground are represented by positive and negative integers respectively.

Present across USA, UK,
Singapore, India, UAE & more.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	6									
2)	-2									
3)	330									
4)	-5									
5)	<table border="1"><tr><td>×</td><td>-3</td><td>-12</td></tr><tr><td>4</td><td>-12</td><td>-48</td></tr><tr><td>-5</td><td>15</td><td>60</td></tr></table>	×	-3	-12	4	-12	-48	-5	15	60
×	-3	-12								
4	-12	-48								
-5	15	60								
6)	$a \times (b \times c) = -30$ $(a \times b) \times c = -30$ Hence verified.									
7)	Option a)									
8)	-15									
9)	-175									
10)	-420									

FUN FACT

- 1) The product of even number of negative integers is always positive.
- 2) The product of odd number of negative integers is always negative.
- 3) The distributive property of addition over multiplication is $a \times [b + c] = a \times b + a \times c$.
