# Polygon Worksheets 3<sup>rd</sup> Grade

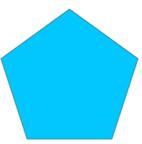

1) Write the names of each shape below and tick mark the shapes those are polygons.

2) Match the polygon to its name.

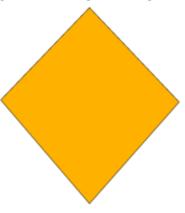

3) Identify the shape. It has ---- sides and ---- corners.

4) Is this a square polygon? Why? Why not?

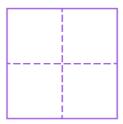

5) Identify the shape. Is this a polygon?

6) James made a new shape by putting 2 rectangles together. What shape has he made? Is it a polygon?

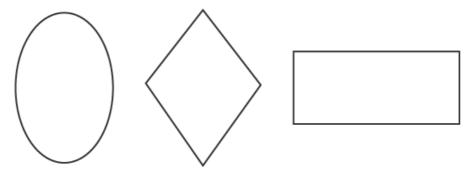

7) Which shapes are used to make this polygon?

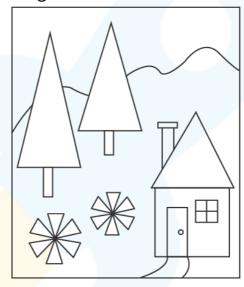

8) Color the polygons.

- 9) Count the number polygons.
  - a) Number of triangles = -----
  - b) Number of squares = -----
  - c) Number of rectangles = -----

10) Construct a polygon with 6 sides.

When you learn math in an interesting way, you never forget.

#### 25 Million

Math classes & counting

#### 100K+

Students learning Math the right way

### 20+ Countries

Present across USA, UK, Singapore, India, UAE & more.

## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect.

She is extremely patient and generous with Miranda."

- Gary Schwartz

- Kirk Riley

- Barbara Cabrera

#### **ANSWERS**

a) Semicircle 1) b) circle c) triangle - Polygon with 3 sides d) oval e) rectangle - Polygon with 4 sides f) pentagon - Polygon with 5 sides Triangle 2) Square Rectangle 3) It is a pentag<mark>on. It has</mark> 5 sides and 5 corners. 4) No. it is not a square polygon. The corners are not straight. 5) This is a <u>Triangle</u>. It has <u>3</u> sides and <u>3</u> corners. It is a 3 sides polygon.

6)	James has made a rectangle with 2 rectangles. Yes it is a polygon with 4 sides.
7)	4 squares are used to make this Polygon.
8)	
9)	Number of triangles = 15  Number of rectangles = 4  Number of squares = 5  Number of total polygons - 24
10)	

# **FUN FACT**

- 1. Three-dimensional shapes have some thickness or depth.
- 2. Quadrilateral shapes are four-sided closed figures made with straight lines.
- 3. Polygons are closed geometric shapes made of straight lines. They are named after the number of sides they have.
