## Proving Lines Parallel Worksheets

Find the measure of the missing angles to make the lines  $u$  and  $v$  parallel.

1.	2.	3.
		
4.	5.	6.
		

Find the value of  $x$  that makes line  $m \parallel$  line  $n$ .

7.	8.	9.
		

10. Determine the angles if the lines are parallel?

When you learn math  
in an interesting way,  
you never forget.

Math classes &  
counting

**100K+**

Students learning  
Math the right way

**20+ Countries**

Present across USA, UK,  
Singapore, India, UAE & more.

## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1. $66^\circ$	6. $81^\circ$
2. $20^\circ$	7. 40
3. $40^\circ$	8. 30
4. $100^\circ$	9. 30
5. $90^\circ$	10. $55^\circ$

## FUN FACT

1. Parallel lines do meet at some point. They meet at infinity.
2. Parallel lines cut by a transversal create 8 angles that have relationships. If you know the measurement of 1 of the angles and the relationship between angles, you can find the remaining 7 angles.
