FUN FACT

1. Adding zero to any number gives the number itself. For example, $34 + 0 = 34$.
2. When 1 is added to any number, you get the next number. For example, $5 + 1 = 6$.
3. The order in which you add a group of numbers doesn't matter, the answer is the same. For example, $2 + 5 + 3 = 10$; and $5 + 3 + 2 = 10$.
