## FUN FACT

1. Repeated addition is also a type of multiplication.
2. When 1 is added to any number, you get the next number. For example,  $5 + 1 = 6$ .
3. The order in which you add a group of numbers doesn't matter, the answer is the same. For example,  $2 + 5 + 3 = 10$ ; and  $5 + 3 + 2 = 10$ .
