## Simplifying Square Roots Worksheets

Find the value of the expressions in questions 1-5

Round answers to 3 decimals where required

1)  $\sqrt{169}$

2)  $\sqrt{36} - \sqrt{49}$

3)  $\sqrt{144} + \sqrt{81}$

4)  $\sqrt{146}$

5)  $\sqrt{143}$

Simplify questions 6-7 to the lowest term

6)  $\sqrt{20/2}$

7)  $(4 - \sqrt{8})/2$

8) The square root of a negative number is a complex number. True or False

9) Using a suitable identity, simplify the following expression:  $\frac{(a^2+b^2-2ab)}{a^2-b^2}$

10) Some people are seated in a bus. The number of rows in the bus is equal to five times the seats in one row. If the total number of seats in the bus is 180, find the number of seats in one row.

**When you learn math  
in an interesting way,  
you never forget.**

**25 Million**

Math classes &  
counting

**100K+**

Students learning  
Math the right way

**20+ Countries**

Present across USA, UK,  
Singapore, India, UAE & more.

## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	13
2)	-1
3)	21
4)	12.083
5)	11.958
6)	$\sqrt{5}$
7)	$2 - \sqrt{2}$
8)	True
9)	$\frac{(a - b)}{(a + b)}$
10)	6

## FUN FACT

- 1) A perfect square always ends with the digits 1, 4, 5, 6, and 9.
- 2) A perfect square will always end with an even number of zeroes.
- 3) 0, 1 are the only numbers whose square and square roots are the same.
