## SLOPE OF A LINE WORKSHEETS

1) The slope of the line that passes through the points (1, 27) and (8, 3) is \_\_\_\_.

2) The slope of the line that passes through the points (-8, 3) and (4, 2) is \_\_\_\_.

3) Find the slope of the line  $\overleftrightarrow{AB}$ .

4) The slope of a line joining two points (-7, 5) and (2, k) is  $-\frac{2}{9}$ . Find k.

5) Match the lines with their slopes:

a. (1,2) (2, -3)	1. $1/2$
b. (0,2) (5,4)	2. -2
c. (6,3) (-4, -2)	3. $2/5$
d. (0,7) (3,1)	4. -5

6) A car rental in a city rents its cars for an upfront fee and a daily fee based on the number days the car was rented.

Drake rented a car and saw that he owed \$62 after 4 days and \$86 after 7 days when he returned the car. Find the daily fee.

- 7) There are two straight lines  $\overleftrightarrow{AB}$  and  $\overleftrightarrow{CD}$ , where  $A = (0, 7)$ ,  $B = (6, 9)$ ,  $C = (0, -4)$ , and  $D = (12, 0)$ . Is  $\overleftrightarrow{AB} \parallel \overleftrightarrow{CD}$ ?

**Hint:** The slopes of two parallel lines are always equal to each other.

- 8) The slope of a line which is parallel to the line having a slope of  $\frac{2}{3}$  is \_\_\_\_\_.
- 9) Find the slope of a line which is inclined at an angle of 30 degrees with the positive y-axis and in the anticlockwise direction.
- 10) The slope of a vertical line is \_\_\_\_\_.

When you learn math  
in an interesting way,  
you never forget.

**25 Million**

Math classes &  
counting

**100K+**

Students learning  
Math the right way

**20+ Countries**

Present across USA, UK,  
Singapore, India, UAE & more.

## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	$-\frac{24}{7}$
2)	$-\frac{1}{12}$
3)	$-\frac{1}{2}$
4)	3
5)	a) 4 b) 3 c) 1 d) 2
6)	\$8
7)	Yes, $\overleftrightarrow{AB} \parallel \overleftrightarrow{CD}$
8)	$\frac{2}{3}$
9)	$\sqrt{3}$
10)	Undefined

## FUN FACT

1. The slope of a line is defined as  $\frac{\text{Rise}}{\text{Run}}$ .
2. Two lines are said to be parallel if their slopes are equal.
3. Two lines are said to be perpendicular if the product of slopes is -1.
