Slope Worksheets

- 1) The slope of the line that passes through the points $(-2, 11)$ and $(-2, 6)$ is ____.
- 2) The slope of the line that passes through the points $(3, 5)$ and $(-7, 5)$ is ____.
- 3) The slope of the line that passes through the points $(7, -5)$ and $(3, -4)$ is ____.
- 4) The slope of the line that passes through the points $(1, 13)$ and $(-2, 7)$ is ____.
- 5) Is the line passing through the points $(3, 2)$ and $(4, 3)$ parallel to the line passing through the points $(-1, -2)$ and $(-7, -8)$? Justify your answer.
- 6) Find the slope of the line using two points on it.

7) Find the value of k if the slope of the line joining the points $(-7, 5)$ and $(6, k)$ is $\frac{2}{13}$.

8) There are two straight lines \overleftrightarrow{AB} and \overleftrightarrow{CD} , where $A = (9, 6)$, $B = (-6, -4)$, $C = (2, -2)$, and $D = (-4, 7)$. Is $\overleftrightarrow{AB} \perp \overleftrightarrow{CD}$? Why?

9) Find the value of m if $A(-3, m)$, $B(0, 5)$ and $B(3, 7)$ are collinear.

Hint: Slope of AB = Slope of AC as A , B , and C are collinear.

10) The population of New York City in 1990 was 17 million and it was 19 million in 2020. If the relation between the years and the population is linear, find the increase in the population per year.

Hint: Write two ordered pairs representing (year, population) and find the slope.

**When you learn math
in an interesting way,
you never forget.**

25 Million

Math classes &

100K+

Students learning
Math the right way

20+ Countries

Present across USA, UK,
Singapore, India, UAE & more.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	Undefined
2)	0
3)	$-\frac{1}{4}$
4)	2
5)	Yes, as the slopes of both lines are the same.
6)	$-\frac{2}{3}$
7)	7
8)	Yes, as the product of their slopes is -1.
9)	3
10)	$\frac{1}{15}$

FUN FACT

- 1) The slope a line joining two points (x_1, y_1) and (x_2, y_2) is $\frac{y_2 - y_1}{x_2 - x_1}$.
- 2) If the slope of a line is 0, then it is a horizontal line.
- 3) If the slope of a line is undefined, then it is a vertical line.
