## 7th Grade Surface Area Worksheets

1. The sum of all the areas of all the three dimensional shapes that cover the object is called \_\_\_\_\_.
2. Calculate the total surface area of the cuboid whose dimensions are 5 cm  $\times$  6 cm  $\times$  9 cm.

3. How many identical square surfaces are there in a cube?
4. The total surface area of a cubical die is  $96 \text{ cm}^2$ . Find the length of each edge?
5. The total surface area of a cubical chalk box is  $216 \text{ cm}^2$ . What is the length of its edge?
6. The edge of a cubical room is 10 m. The inner walls are to be painted (inclusive of windows and doors). Find the expenditure to be incurred at the rate of \$5/- per square metre.

7. Jerry wants to make a closed cardboard box of length 25 cm, breadth 10 cm and height 5 cm. How much cardboard would he need at least?

8. The length, breadth and height of a room are 15 m, 8 m and 5 m respectively. Find the surface area of its 4 walls and the floor (inclusive of doors and windows).

9. The length, breadth and the height of a tin box are 16 cm, 26 cm and 15 cm respectively. Find the area of tin required to make 30 such boxes. If the cost of tin per square cm is \$0.08, find the amount required to make 30 boxes.
10. The inner perimeter of a rectangular room is 400 m. Its height is 3 m. What is the amount to be spent to paint the walls of the room at the rate of \$10 per square metre. (inclusive of doors and windows)

When you learn math  
in an interesting way,  
you never forget.

Singapore, India, UAE & more.

## Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1. Surface area	6. 4 cm
2. $258 \text{ cm}^2$	7. $850 \text{ cm}^2$
3. Six	8. $420 \text{ cm}^2$
4. 4 cm.	9. Tin required to make 30 boxes = $62,760 \text{ cm}^2$  Cost = \$5020.8
5. 6 cm.	10. \$12,000

## FUN FACT

1. The skin of an average adult covers an area of 2 square meters.
2. Human lungs contain about 500 million air pouches for exchange of oxygen. They create a surface area of around half the size of a tennis court.
