TEMPERATURE CONVERSION WORKSHEET I

- 1) Isaac bought a jacket for winter. It was mentioned about the jacket that it is comfortable down to -10°C . Till what $^{\circ}\text{F}$ is the jacket comfortable?

- 2) Weather station predicted about the temperature of the city to be 44°F on Sunday. What would be the temperature in degree Celsius?
- 3) Yasmin had a liquid at 90°F , she wants to raise it temperature by 5°C . What will be the temperature of the liquid in $^{\circ}\text{F}$ after heating?
- 4) Temperature of the room in winter nights is found to be 2°C in some region. What will this temperature be in K?
- 5) Average temperature in February was 318 K. Find the average temperature in $^{\circ}\text{C}$.

- 6) Fin bought a soda and measured its temperature to 92°F .
Temperature of the soda in $^{\circ}\text{C}$ will be?

- 7) Convert the given temperatures into $^{\circ}\text{F}$:
i) 27°C ii) 356 K
- 8) Thomas was driving his truck and engine got heated up. If the temperature of the engine was found to be 246°F . The normal operating temperature of the engine is 240°F . Find out the decrease in temperature in K , required for normal working of the engine.

- 9) Temperature at night is 24°C lesser than temperature at day. Find the temperature at night if at day it is 242°F .

- 10) Joseph put pizza in the oven for heating at 410°F . What will be the final temperature of the pizza after heating in $^{\circ}\text{C}$?

When you learn math

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1)	14°F
2)	6.667°C
3)	99°F
4)	275.15K
5)	44.85°C
6)	33.333°C
7)	i) 80.6°F , ii) 181.13°F
8)	3.333K
9)	198.801°F
10)	210°C

FUN FACT

1. Range of temperature in universe is from 3,500,000,000 Kelvin (a supernova) to 3 Kelvin (space).
2. Average temperature of the sun is 5600 K.
3. Theoretically, lowest possible temperature is 0 K.
