## FUN FACT

1. Adding zero to any number gives the number itself. For example,  $7891 + 0 = 7891$ .
2. When 1 is added to any number, you get the next number. For example,  $85 + 1 = 86$
3. The order in which you add a group of numbers doesn't matter, the answer is the same. For example,  $2 + 5 + 3 = 10$ ; and  $5 + 3 + 2 = 10$
