TRIGONOMETRY WORKSHEETS

1. If $\sin A = \frac{5}{13}$, find: $\cos A$ and $\tan A$
2. In a triangle, ABC, right-angled at B, $AB = 7$, $BC = 24$. Find AC.
3. Given that $\operatorname{cosec} A = \operatorname{cosec} C$, then angle $A =$ angle C ?
a) True
b) False
4. $\sin A = 1$, find $\cos A$ and $\cot A$.

5. If $\operatorname{cosec} A = \frac{13}{5}$, then:
a) $\sin A = \frac{5}{12}$
b) $\cos A = \frac{12}{13}$
c) $\sec A = \frac{13}{12}$
d) None of the above.
6. $\cot A = \frac{12}{17}$ for some value of A.
a) True
b) False

7. In a triangle, PQR, right-angled at Q, PQ = 35 and PR = 37. Then find $\sin P$.

8. Given a triangle PQR, right-angled at Q such that AB = 35 and BC = 8. Match the following on the basis of the given data:

a- $\sin A$	p- $\frac{35}{37}$
b- $\cos A$	q- $\frac{35}{8}$
c- $\tan A$	r- $\frac{8}{37}$
d- $\tan C$	s- $\frac{8}{35}$

9. If $\operatorname{cosec} C = \frac{13}{12}$. Find $\tan C + \cot C$.

10. In a triangle IJK right-angled at J, IJ = 4, and $IK - JK = 2$. Find $\sin I$ and $\sin K$

When you learn math
in an interesting way,
you never forget.

Why choose Cuemath?

"Cuemath is a valuable addition to our family. We love solving puzzle cards. My daughter is now visualizing maths and solving problems effectively!"

- Gary Schwartz

"Cuemath is great because my son has a one-on-one interaction with the teacher. The instructor has developed his confidence and I can see progress in his work. One-on-one interaction is perfect and a great bonus."

- Kirk Riley

"I appreciate the effort that miss Nitya puts in to help my daughter understand the best methods and to explain why she got a problem incorrect. She is extremely patient and generous with Miranda."

- Barbara Cabrera

**ANSWERS**

1.	$\cos A = \frac{12}{13}$ and $\tan A = \frac{5}{12}$
2.	25
3.	True
4.	$\cos A = 0$ and $\cot A = 0$
5.	b. $\cos A = \frac{12}{13}$
6.	True
7.	$\frac{8}{37}$
8.	a-r, b-p, c-s, d-q
9.	2.8
10.	$\sin I = \frac{3}{5}$ and $\sin K = \frac{4}{5}$

FUN FACT

1. There are a total of 6 trigonometric ratios, three are main trigonometric ratios for right triangles, and three are reciprocals of trigonometric ratios.
2. Trigonometry helps in computing the angles and distances in fields such as astronomy, mapmaking, surveying, and artillery range finding.
3. The 'metron' means a measure and the word "trigonon" comes from the Greek word that means three angles and.
